TIP: Footer Links

Just like the Header, all of the page links could be attached to their associated pages.

However, if multiple links to a page exist (e.g. in a header, footer and sidebar perhaps) and they all link to each other then you may notice a significant delay in loading the page designs due to the large number of interconnections.

Therefore, it is better to link only to pages that aren't linked to from elsewhere on the page.

In this case, only the "Privacy Policy" link is connected.

Used By	Link CRM V1\Login.gui

Thumbnails

The linked pages are Thumbnail versions of the components to save space and make the design clearer. Use right-drag from the Project file tree to add the Thumbnails. Note that these do not have the full functionality that full-size Components do.

Replace Top

The links also use the "Replace Top Window" navigation type (this is the default for Thumbnails). These are ideal for Web page navigation and also support Back/Forward
